Best Work!

I've been driving my Tesla Model 3 Long Range for over a year now, and it's honestly been a game-changer. The acceleration is incredibly smooth and fast — it feels like a sports car. I love not having to stop for gas anymore. Charging at home is convenient, and road trips have been easy thanks to the Supercharger network. Range anxiety was a concern before I bought it, but in practice, the 330+ miles of range has been more than enough for daily use and travel.
